PROJECT

Analyzing Phishing Techniques That Bypass Spam Detection

C-DAC NOIDA • May 2025 – June 2025

- Analyzed phishing techniques like CSS-based tracking, white text obfuscation, image embeds, and spoofed domains that evade spam filters by avoiding JavaScript and keyword detection. Tested evasion methods in simulated email environments using ethical tools.

EDUCATION

Bachelor of Information Technology

Government Engineering College Idukki • Idukki , Kerala , INDIA • 2027 • 6.57
